- Our Team

A woman with short dark hair is wearing a Microsoft HoloLens augmented reality headset. She is looking slightly to the right with a neutral expression. She is wearing a patterned top with a mix of teal, purple, and white. The background is a blurred, futuristic industrial or laboratory setting with blue and white tones, featuring various pieces of equipment and a grid-like floor. In the top right corner, there is a logo consisting of three vertical bars in blue, teal, and green.

Why Sagacity Consulting

Education 4.0 is no longer just a buzzword – it's here! It's the future of learning, one that focuses on personal growth, collaboration and the integration of technology into education.

Our team consists of education and technology experts passionate about promoting innovation in the learning environment.

We offer a variety of services aimed at creating learning environments tailored to the needs of learners and employees alike.

Our mission is to use technology to create an innovative learning experience, promoting communication, collaboration, and creativity – so that everyone can reach their full potential.

01

Program Design

We believe in the power of design thinking to drive innovation and deliver exceptional products and services to our clients. Our design-thinking process is built on a foundation of empathy, experimentation, and iteration. We start by deeply understanding our customers and their needs through research, observation, and co-creation. Our design-thinking approach also allows us to collaborate and co-create with our clients and partners, bringing together diverse perspectives and expertise to drive innovation and deliver exceptional solutions.

We develop programs tailored to audience needs while ensuring sequencing and scaffolding of the curriculum.

02

Course Design and Content Development

We offer comprehensive course and content development solutions for organizations of all sizes. Our experienced team is dedicated to designing engaging learning experiences that meet your unique learning objectives while incorporating interactive elements such as multimedia, digital simulations, games, and assessments.

We use the appropriate process like ADDIE and SAM to plan and manage our development project. We create an instructional design plan that integrates interactive activities, multimedia elements such as video clips, audio recordings, animations, infographics, graphics, images etc., and other resources into the content. We use different learning theories and ID principles to develop an effective and engaging course and content, working with talented subject matter experts to deliver the best design and content.

03

eLearning Development

We help our clients to select and use innovative eLearning tools to provide the best learning experience. We help educators and learners to access high-quality learning experiences that are engaging, interactive, and personalized to their needs.

We have experience working with the latest and most popular LMS, authoring and digital tool like D2L, blackboard learn, and Moodle, in addition to, Adobe Captivate, Articulate 360 and much more.

04

Learning Delivery

We provide several modes for learning delivery tailored to our client's needs. This can be :

- Instructor-led
- Virtual Instructor-led
- Blended learning
- Self-paced eLearning

07
